Intermediate PLC Training (CX-Programmer)

Two Day Practical Workshop

This is a two day workshop on the more advanced terminology and techniques associated with Programmable Logic Controllers. It is ideal for those who already have a basic understanding of PLCs and need to increase their operational knowledge of software instructions and programme development techniques.

The Workshop

The workshop is a mixture of discussion and practical exercises. It covers the following areas:

- Application of software instructions
- Data movement and shifting
- Data monitoring
- Online editing
- Use and set-up of special I/O modules
- Software design and documentation

Who Should Attend?

The workshop is suitable for those who require more advanced knowledge of Omron PLC hardware and software. Delegates should ideally have a good, basic working knowledge of Omron PLCs or have attended the basic PLC workshop.

OMRON

Course venues

We hold training sessions at our engineering headquarters in Plymouth and our offices in Cardiff.
For more information on our next Introduction to PLCs workshop or to book a place, get in touch.

Course fee: £295 (ex. VAT)
